Quality Improvement Program (QIP) Purpose:

PURPOSE

The purpose of the Quality Improvement Program (QIP) is to provide a formal process to systematically monitor and objectively evaluate the quality, appropriateness, efficiency, effectiveness and safety of the care and service provided to the Children and Adolescent Clinic patients.

The QIP also provides oversight and guidance for the following:

a. Determining practice guidelines and standards on which the program’s success will be measured.
b. Complying with all applicable laws and regulatory requirements, including but not limited to, the Department of Health and Human Services, other applicable state and federal regulations that govern our practice, and strive to achieve NCQA PCMH recognition and standards.
c. Structure a team environment that fosters and promotes focus initiatives.
d. Ensure that our entire staff is qualified and able to provide the care and service to our patients.
e. Conducting member satisfaction survey to identify opportunities for improvement.
f. Reducing health care disparities by measuring, analyzing and redesign of services and programs to meet the healthcare needs of our diverse membership.

On an annual basis, our practice will conduct a written evaluation of the effectiveness of its quality improvement activities to assess how well they meet the goals and objectives of the QIP. The evaluation assesses the program structure, practitioner participation, quality resources, completed and on-going activities, and barriers to improvement.
